10- Coyote sightings

1- Sighting was multiple coyotes

1- Sightings with coyote(s) preying on cat or dog

All calls were relayed to Orange County Animal Control

TIP OF THE MONTH: The ABC's of Pool Safety

Drowning is the #1 killer of children under the age of 5. The majority of drowning occurs in residential swimming pools and spas. Drowning is 100% preventable, only a momentary lack of supervision puts a child at risk.

A = Adult Supervision

- ❖ Assign an adult to supervise children in and around the swimming pool and spa. This is needed whether there is one parent or guardian present or numerous adults present such as during a family event or party.
- ❖ Maintain constant eye-to-eye supervision with children in and around the swimming pool and spa.
- ❖ Remove children from the swimming pool and spa area for any distraction such as a telephone call, use of restroom, etc.
- ❖ Issue the adult supervisor an item such as a whistle, bracelet, etc. to reinforce which adult is in charge of the safety of the children.
- ❖ Floaties or other inflatable flotation devices are not life jackets and should never be substituted for adult supervision.
- ❖ Maintain a clear view (no trees, bushes or other obstacles) from the home to the swimming pool and spa.
- ❖ Ensure any adult responsible for the children know the emergency services telephone number and also your location address in the event emergency personnel are needed to be called to the scene.

B = Barriers

- ❖ Have a fence enclosure that isolates your swimming pool and spa from the home, play areas, front and side yards and the neighbor's yard.
- ❖ Make sure all gates in the isolation fence are self-closing and self-latching.
- ❖ Multiple layers of barriers isolating the pool and spa from children should be installed. In addition to an isolation fence, one or more of the following safety features can provide the additional protection necessary:
 1. Approved swimming pool and spa safety cover
 2. Approved swimming pool and spa alarm
 3. Exit alarms on doors providing access to the swimming pool and spa
 4. Keep all doors and windows leading to the swimming pool and spa area locked
 5. Doors providing access to the swimming pool and spa equipped to be self-closing and self-latching with a release mechanism high enough to be out of the reach of a child.
 6. The man-door from the garage should be self-closing and self-latching with a release mechanism high enough to be out of the reach of a child
 7. Perimeter yard fence provided with a self-closing and self-latching gate

- ❖ All chairs, tables, large toys or other objects that would allow a child to climb up to reach the gate latch or enable the child to climb over the isolation fence should be removed or kept inside the fenced area.

C = Classes

- ❖ Learn how to perform Cardiopulmonary Resuscitation (CPR).
- ❖ Enroll your child in swimming lessons.
